DETAILED ACTION

Receipt of Papers

Receipt is acknowledged of the 1.137 Petition, Amendment A, and Information Disclosure Statement, all received by the Office December 26, 2002.

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection, found below.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 4, 8-10, 13-15, 18, and 22 rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 4,769,236 to Panoz *et al.* in view of the Physicians desk Reference.

Panoz *et al.* disclose a pharmaceutical formulation with a high degree of dissolution rate and solubility. More specifically, the reference teaches spraying an amorphous form of active in the presence of a stabilizer and a crystal formation inhibiting agent. Panoz *et al.* teach that in an advantageous embodiment of their invention, the inhibiting agent is constituted by the mixture of polyethylene glyc9l and polyvinyl pyrrolidone (see column 1, line 58 – column 2, line 2). Panoz *et al.* teach that the organic solvent employed can be ethanol (see example 1). The reference also discloses the process of making the formulation (see the examples).

Application/Control Number: 09/438,994

Art Unit: 1615

Panoz et al. do not teach that the active agent be fenofibrate. However, it is the position of the examiner that absent evidence of unexpected results, the substitution of a known active in a known process is not patentable. The reference teaches the same combination of polyethylene glycol and polyvinyl pyrrolidone, to inhibit the formation of crystals in the formation of a pharmaceutical product. Additionally, a segment from the PDR is attached to show that fenofibrate is a known active agent with success in regulating lipid content.

Additionally, the reference does not specifically teach that the formulation can be made into a tablet or a capsule. However, one of ordinary skill in the art would understand the general teachings to "pharmaceutical compositions" to include these two well known types of formulations. This alone does not render patentable distinction to the claims.

One of ordinary skill in the art would have been motivated to use any well known active in the process disclosed by Panoz *et al.*, with the expected result being the creating of a pharmaceutical formulation with high dissolution and solubility. Therefore, this invention as a whole would have been *prima facie* obvious to one of ordinary skill in the art at the time the invention was made.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Application/Control Number: 09/438,994

Art Unit: 1615

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this

final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Amy E Pulliam whose telephone number is 703-308-4710. The

examiner can normally be reached on Mon-Thurs 7:30-5:00, Alternate Fri 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Thurman Page can be reached on 703-308-2927. The fax phone numbers for the

organization where this application or proceeding is assigned are 703-305-3592 for regular

communications and 703-305-3592 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is 703-308-1235.
